

LIGHTWEIGHT.

STREAMLINED.

FUEL EFFICIENT.

Founder Wally Byam knew that a rounded, low-profile shape would make towing easier and more stable. And he knew that aluminum would make his trailers as light as possible.

The successful combination of shape and lightweight design has made the Airstream travel trailer world-renowned for its superior structured integrity. That's because the Airstream employs semi monocoque construction, using a riveted inner and outer layer of aluminum stretched over the frame. This way, the skin itself becomes a working part of the integral structure.

Hand-built with a craftsman's attention to detail, the Airstream offers unmatched durability and strength for its weight. Just ask one of the more than 100,000 Airstream owners!

CONTEMPORARY COMFORT & PRACTICALITY

When you're ready to take a break from the great outdoors, the Flying Cloud invites you inside with a flair of modern design. From fabrics to fixtures to cabinetry, the Flying Cloud line reflects your taste with clean, comfortable, contemporary styling throughout. The right-sized travel trailer for any adventure, the Airstream Flying Cloud combines lightweight ruggedness with total practicality.

Advanced storage solutions and multi-functional workspaces make the Flying Cloud the perfect choice for extended travel or full time use. With its eleven different floorplans and a variety of options, it's no wonder it has been one of Airstream's most popular models for decades.

So no matter if you're a first-time Airstreamer or seasoned veteran of the road, the Flying Cloud gets you on your way to your next adventure in contemporary style, luxurious comfort and long-lasting value.

Product information, specifications, and photography in this brochure were as accurate as possible at time of printing. Photographs may contain some features that are optional on your vehicle. Since we continually strive to improve our products, actual products may differ. Prices and specifications are subject to change without notice. All capacities are approximate and dimensions are nominal. Some features or options may be different or unavailable in Canada.

Vehicle Loading – Every effort has been made to provide the greatest number of options for the recreation vehicle owner. Along with these choices comes the responsibility to manage the loads that are imposed by the choices so that they remain within the manufacturer's specified chassis weight limits. Do not overload the recreation vehicle.

Dry Weights – Based on standard features; optional equipment not included. Net carrying capacity (NCC) determined by subtracting unloaded vehicle weight (UVW) from gross vehicle weight (GVWR) and includes fluids, options, and cargo. Liquid capacities and weights are approximations only.

Warning – This information is intended as a guide only. Weights of individual vehicles may vary. Consult your owner's manual for complete loading, weighing, and towing instructions.
