

HOLIDAY 1000

1992 MOTORHOMES

VALUE GOES A LONG WAY IN THE HOLIDAY 1000.

The Holiday 1000 sets a new standard of quality and affordability in Class A motorhomes. The smooth-riding, smooth-handling Holiday 1000 makes the going easy, out on the interstate or traveling winding back roads.

The Holiday 1000 has a style that's as contemporary as today. The grill and bumpers have been restyled. Graphics in new colors give it a distinctive look.

Inside, you'll find everything you need for first class travel. All the hallmarks of Holiday Rambler quality are here: fabrics that are just a little better, carpeting that's a little thicker. And the luxuries are built on solid engineering.

Count on your Holiday 1000 to keep its quality, comfort and value, miles down the road, whether you're traveling to the Great Lakes or the lake just across the county line.

Dashboard instrumentation is new for '92, provides easy reading and convenience.

The Holiday 1000 is the enjoyable way to get away.

Holiday 1000 Touring: The Great Lakes.

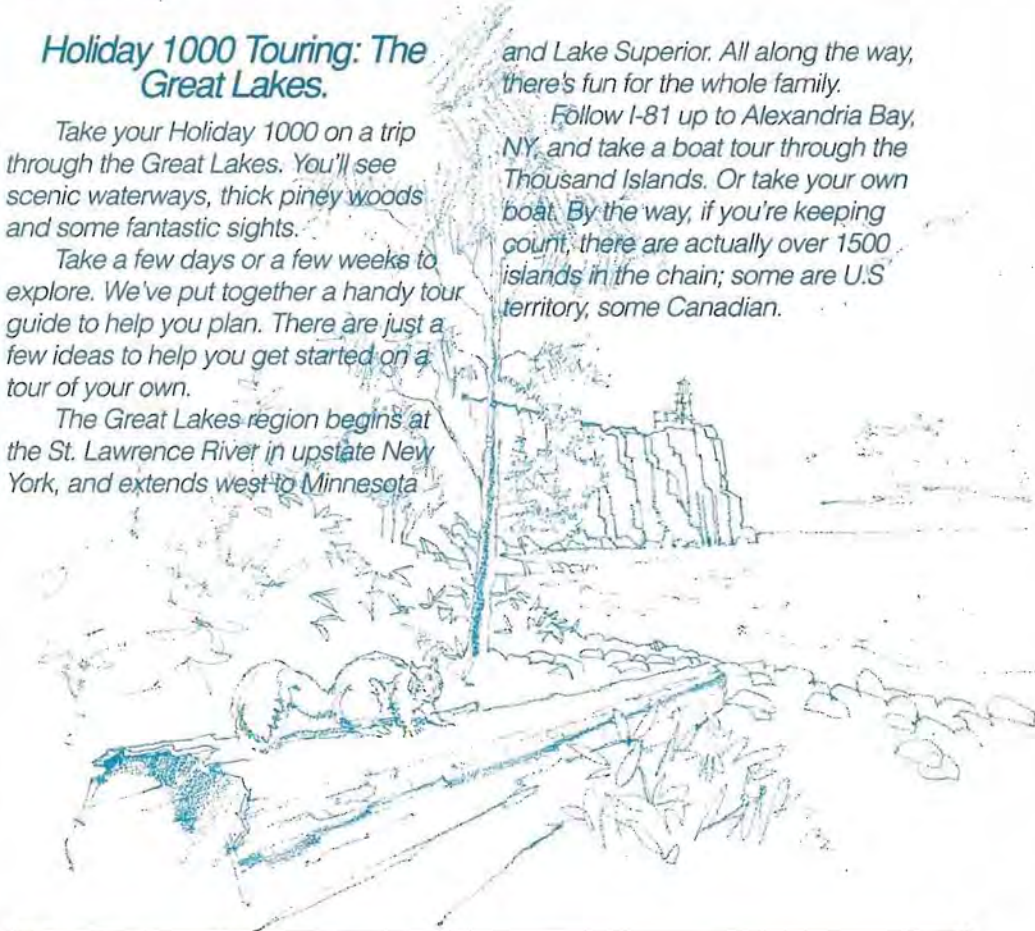

Take your Holiday 1000 on a trip through the Great Lakes. You'll see scenic waterways, thick piney woods and some fantastic sights.

Take a few days or a few weeks to explore. We've put together a handy tour guide to help you plan. There are just a few ideas to help you get started on a tour of your own.

The Great Lakes region begins at the St. Lawrence River in upstate New York, and extends west to Minnesota

and Lake Superior. All along the way, there's fun for the whole family.

Follow I-81 up to Alexandria Bay, NY, and take a boat tour through the Thousand Islands. Or take your own boat. By the way, if you're keeping count, there are actually over 1500 islands in the chain; some are U.S. territory, some Canadian.

ADVENTURE TAKES A HOLIDAY.

Step into a Holiday 1000 motorhome, and the first thing you'll notice is how bright and spacious it is. The new Flexsteel® sofa makes the living area roomier than ever, while providing plenty of comfort. There are new window treatments throughout. A designer-coordinated chair completes the picture. A 13" remote control color TV is standard.

Choose solid hardwood raised panel doors in medium or bleached oak. Decorative glass accents the living room overheads. Dinettes are

framed in aluminum—not wood like some motorhomes. Tops and sides are padded for extra comfort.

The fully-equipped kitchen provides enough counter space for the fussiest chef. A full-size stainless steel sink, with a handy hardwood cover, and a Dometic® refrigerator, rattle-free Magic Chef® four-burner range, and touch-control microwave are all standard features.

The bathroom is well-planned and bright, with plenty of lighting. The bath features an easy-to-clean, one-piece fiberglass shower/tub combination. Note the extra touch of quality afforded by designer fixtures.

Bedrooms provide all the best in travel comfort. Carpeting is thick and rich. Bedspreads and throw pillows are color-coordinated. On most models, a comfortable queen-size bed is standard; twin beds are optional. A new color-coordinated chair rail provides a designer accent.

Options include a cable TV hookup, a VCR hookup, a Sony rear back-up vision system, a telephone jack, hydraulic leveling jacks, and more. See complete specifications and floor plans in the back of the workbook.

A pleasant surprise—plenty of room in the bathroom.

BEHIND THE RICH DECOR IS QUALITY CONSTRUCTION.

Holiday Rambler rolls out ahead of the competition with some of the most rugged construction in the industry. We take the time to test new ideas before they go into production. So when you get your Holiday 1000, you can count on features that are tested and proven. The extra effort pays off in years of extra comfort—and extra value—down the road.

Cabinet doors in all units are solid hardwood and mortise-and-tenon jointed. Other manufacturers use hollow core doors which are stapled or mitered together. Frames are stile constructed, then attached

to the aluminum frame to prevent sagging.

Drawers slide out smoothly on low-friction drawer glides. Positive catches ensure that cabinet doors open easily, shut firmly.

Extra water pump switches in the bathroom and the extra radio switch in the bedroom have been added for your convenience.

The framing under dinette seats is aluminum—not cheap plywood. It's stronger and more durable.

Exterior seams, compartments and fixtures are sealed with a Dow Corning silicone that's formulated to last 30 years.

Niagara Falls

Niagara Falls was discovered by LaSalle in 1678. Since then, the cascading waters have been discovered by millions. Whether you take your perspective from the American side or the Canadian side, this is truly one of those sights everyone should see at least once. A boat ride on the Maid of the Mist takes you behind the thundering water.

In the bedroom, fully-lined wardrobes and easy-to-reach cabinets provide ample storage for all your traveling gear.

The queen-size bed flips up for extra storage, locks down securely.

See the difference superior engineering can make.

1. Alumaframe® is Holiday Rambler's welded aluminum construction. It's the same type of construction found in many aircraft: interlocked two-way welded 1½" C-channel aluminum superstructure, with studs 24" on center. Nobody else has it. And for lightweight strength and durability, nobody can beat it.

2. The Alumaframe superstructure allows wiring to be easily routed anywhere. Protective thermoplastic grommets between the wiring and frame prevent electrical problems down the road.

3. Holiday Rambler design engineers create clay prototypes to test sizing, symmetry, and aerodynamics of motorhomes. This, combined with computer-aided design, gives Holiday Rambler a technological advantage over most competitive motorhomes.

4. A corrosion-resistant aluminum sheet barrier below the frame helps keep the road grit, grime and moisture outside the coach. Blandex® wood flooring eliminates seams and resists moisture which can cause costly reflooring.

5. Holiday Ramblers are double-insulated. Interior paneling, bead foam and craft paper are laminated together and fastened directly to the superstructure. The 1½" R-5 fiberglass insulation is hand-fitted in the frame. The durable fiberglass outer skin is riveted on.

6. Holiday Ramblers have plenty of basement storage—up to 110 cubic feet in some models.

LOW-MAINTENANCE FEATURES TO LOOK FOR.

We understand that you've got better ways to spend your time than performing constant maintenance, so we've designed in the quality you need to make your travels as carefree as can be.

Check the seals on windows and doors. All Holiday Rambler models feature radius self-sealing rubber gaskets around windows. This keeps moisture from pooling in the seams and helps keep your coach weathertight. The rounded seal means there's no need for caulking which can cause ugly stains and crack over time.

Take a close look at roof construction. Many manufacturers use flat, one-piece roofs which can actually prevent water from running off. Holiday Rambler's exclusive tapered roof is pitched 1 in. per 4 ft. It slopes away from the center and minimizes pooling water. The center seam is double-sealed—lapped and riveted. The roof overlaps the sides and is riveted to the outer skin to ensure a weathertight seal. How do we know it's weatherproof? The rain test booth at the Holiday Rambler plant subjects roof and window seams to a torrential soaking to make sure.

HOW TO MAKE YOUR CHOICE THE RIGHT CHOICE.

There are literally hundreds of RVs on the market, an overwhelming array to choose from. So we've created this handy checklist to make your choice easier.

Look at as many units as you have time, and take notes while you're looking. Consider how many people will be using the unit and what your daily routine will be. If you happen onto a floor plan you really like, make a note of it. Jot down which features come standard and which are options. This will make ordering additional options easier when it's time to buy.

Make a list of the units you've been considering. Then look back through your notes and rate each one using this checklist.

- ✓ 1. Does the unit run quietly?
- ✓ 2. Is it easy to maneuver?
- ✓ 3. Does it have a smooth ride?
- ✓ 4. Are the fit and finish of high quality?
- ✓ 5. Can you read the instrument panel easily?
- ✓ 6. Does the manufacturer sponsor service training seminars for your dealer?
- ✓ 7. Does the range have rattle-free burners?
- ✓ 8. Do the window treatments bang against the windows?
- ✓ 9. Does it have quality Flexsteel furnishings?

GET TOGETHER WITH A FEW FRIENDS: THE HOLIDAY RAMBLER RV CLUB.

For nearly 40 years, Holiday Rambler has been bringing people together, helping them share the enjoyment of the open road, and the excitement of discovering America firsthand.

Today, over 13,000 families are members of the Holiday Rambler RV Club—a group of RV owners all dedicated to the pursuit of happiness on the open road. The only membership qualifications are a Holiday Rambler and a good stretch of highway.

For membership details, ask your Holiday Rambler dealer, or call us direct: 219-862-7330.

HOLIDAY RAMBLER HAS BEEN GOING STRONG FOR MORE THAN 38 YEARS.

Holiday Rambler Corporation, one of the nation's leading RV manufacturers, was started in 1953 by a father and son team. In 1986, Holiday Rambler became part of the Harley-Davidson corporate family. We've built a reputation for quality by constantly refining, reconfiguring, testing and retesting every feature of our RVs.

Everyone who builds a Holiday Rambler is responsible for quality control. If a problem does arise, we fix it on the spot. That's how we make "Quality First."
