

Montana

North America's
2005
Montana
No. 1 Selling Fifth Wheel

"Built by People who know RVing"

Montana's 3670 RL floor plan is the most open of all our interiors. Shown above in the elegant Spruce décor, the 3670 RL glows with a traditional, yet spacious atmosphere. Extra tall recliners provide you with the perfect place to chat, watch television or take a little snooze. The "Spacemaker" free-standing dinette, shown at left, features a tabletop which slides forward and back on either side so it is easier to enter and leave the dining area. The elegant, single-pedestal design allows ample leg room under the table. You'll find plenty of additional storage under the hinged seat cushions. Upon close observation, you will recognize the quality of this American-made dinette ensemble to be truly premium.

Move Up To Montana.

At Montana, we believe that, with the right inspiration, you can achieve greatness at most anything — even if it's vacationing, adventuring or just relaxing. We're inspired to build fifth wheels that will enable you to easily achieve all three.

To do this, we know we must build a fifth wheel that provides continuing pleasure over the long haul and in every aspect of the ownership experience. This has been our goal ever since we introduced the Montana.

Montana is the envy of the industry and the Number One choice in North America because we bring together concepts other manufacturers find mutually exclusive — convenience, comfort, quality, innovation and value — and offer it all to you in breathtaking floor plans and interior décors.

It's easy to see why the Montana is the standard against which all other fifth wheels are measured.

Imagine the pleasure of this 5,100 BTU electric fireplace whenever you want to enjoy a touch of cozy warmth.

Quality.

A Montana's appearance speaks of class-leading style and comfort. But we are not satisfied with mere good looks. So, we build the Montana as tough and durable as it is beautiful. Realizing that the final quality of the Montana is a direct result of the quality of everything that goes into it, Montana's engineers analyze every component to ensure years of trouble-free usage.

Not everyone offers quality features like Total Surround Aluminum Plus™ framing, all-steel drawer guides complete with roller ball bearings or real wood trim moldings. Other manufacturers find it easier to talk about quality than to create it. Montana's Old World craftsmen are the finest in the industry and continually strive to provide a level of "fit-and-finish" second to none. Your peace of mind is assured because you are purchasing an RV worthy of its established reputation for quality.

Towability.

Montana is the finest towing fifth wheel on the market. The reasons are clear and simple — First, lightweight ALUMINUM-FRAMING-PLUS lowers the

center of gravity, minimizing sway. Next, the Montana is engineered with great weight distribution. (We even separate the LP bottles to spread the load.) Further, Montana's front cap maximizes aerodynamics. The "end point" of the cap sits lower than the top of the truck cab. This strategic design forces air to flow over and around the fifth wheel instead of under it. Better aerodynamics result in less sway, stress-free towing and increased fuel economy.

Floorplans.

The innovative 3650 RK floor plan creates a unique kitchen and living environment unlike any other fifth wheel. Step down into the fabulous sunken kitchen with double slide rooms and an island bar. Notice the generous amount of kitchen counter space and residential-style cabinetry, designed for maximum storage. The spacious living room features an L-shaped hide-a-bed and a matched pair of residential swivel rockers. Oversize windows allow you to enjoy the scenery while you relax. This model shown in the Desert Sunset décor.

TOTAL SURROUND™

ALUMINUM PLUS

Many Fifth Wheel brands claim to be aluminum framed, but to cut costs most manufacturers use wood framed floors and roofs. At Montana, that's not the case. We build 100% aluminum framing in all the walls and floors, PLUS we utilize state-of-the-art lightweight, machine-fabricated steel rafters in the roof. In addition, for added strength and smoother exterior finish, our one-piece sidewalls are 2" thick and laminated! Check out the difference. You'll be impressed.

Light Bu

We don't recommend driving a truck over the wall of your RV, but isn't it nice to know you could?

t Strong.

Montana's state-of-the-art laminated and layered sidewall construction creates a lighter yet stronger wall than you'll find in any comparable fifth wheel. Inside this amazingly sturdy wall, solid foam insulation provides year-round comfort with higher insulation factors while also reducing outside noise. And, solid foam will not lose its efficiency through settling in your sidewall (unlike fiberglass insulation).

Comfort.

Your level of joy is directly proportional to your level of comfort. That's why Montana pays so much attention to providing comfort. Extra tall slide rooms and 6'5" of height entering the bedroom suite allow ample head room. High-back recliners and queen-sized sofas invite you to relax.

More examples of comfort-focused amenities include big, fully vented windows, residential-grade carpeting and extra-thick queen-size mattresses covered with designer spreads and pillow shams. The result—your sanctuary from the cares of the world is created.

Style.

Three fashionable color schemes form the foundation for Montana's carefully coordinated room décors. Beautiful drapery and upholstery fabrics, designer hardware, fashionable window treatments, walls and countertops in the latest colors and materials—all contribute to Montana's legendary style, setting your fifth wheel home apart from all others in a quiet but dramatic statement that says you've "arrived."

The Montana's bedroom features a single-level floor for safety and convenience, abundant storage and 6'5" of head room, maximizing your comfort.

The amazing 3685 FL front living room, shown here in the Rosewood décor, features four slide rooms for the ultimate in livability. The matching 80-inch king-size sofas allow for plenty of space to converse with friends. A 25-inch television fits snugly in the front entertainment center and is connected to a DVD player with 5.1 surround sound for a truly residential video and audio experience.

Convenience.

At Montana, brilliant ergonomics are a trademark to be found literally at every turn. Veteran travelers instantly recognize RV-friendly features such as a computer work station with data port, Freezeguard™ winterizing system and E-Z Lube wheels. An abundance of more subtle conveniences like a cell phone holder with charging station, plate-depth overhead cabinets and a rechargeable flashlight exist to increase your relaxation.

Our designers have also examined every detail to offer maximum storage and utilization of space. Pull-out pantry baskets, a multi-level Lazy Susan, the "Spacemaker" dinette group and a sliding waste container are just a few examples of the ease of use which is synonymous with all Montana fifth wheels.

Construction.

Floor (R-21)†

1. 10" Steel "Rolled" I-Beam
2. 3" Welded Aluminum Floor Joists on 16" Centers
3. 3" Large-Capacity Heat Duct
4. 1/4" ABS Underbelly
5. Astro-Foil Insulation (97% Heat Reflection)†
6. Full Radius Wrap Aluminum Enclosure
7. Moisture Barrier
8. Fiberglass Insulation
9. 5/8" Seamless, Structurewood Floor Decking with 25-Year Warranty
10. Carpet Pad
11. Residential-Grade Carpeting with Stain Protectant
12. 2" Heat Duct from Furnace into Underbelly

Montana Exterior Details.

The detachable marine power cord is safe, easy to use and completely sealed.

You'll provide easy, safe entry for everyone with our low first step and folding handrail.

Dexter E-Z-Lube™ axles can be lubricated without removing the wheel.

Attic vents provide vital escape routes for unwanted moisture that can accumulate with extended use.

Enclosed, protected sewer dump valves are one of many details in the hidden areas of your Montana.

Roof (R-14)[†]

1. One-Piece EPDM Rubber Roof Membrane with 12-Year Warranty
2. Aluminum Radius Roof Transition Molding
3. 3/8" Structurewood Roof Decking with 25-Year Warranty
4. 5" Fabricated Steel Truss Rafters on 16" Centers
